This material contains content from LOINC® (<http://loinc.org>). The LOINC table, LOINC codes, and LOINC panels and forms file are copyright © 1995-2010, Regenstrief Institute, Inc. and the Logical Observation Identifiers Names and Codes (LOINC) Committee and available at no cost under the license at <http://loinc.org/terms-of-use>.

Certain materials contained in this Interoperability Specification are reproduced from Health Level Seven (HL7) HL7 Implementation Guide: CDA Release 2 – Continuity of Care Document (CCD), HL7 Implementation Guide for CDA Release 2: History and Physical (H&P) Notes, HL7 Implementation Guide for CDA Release 2: Consult Notes, or HL7 Implementation Guide for CDA Release 2: Operative Notes with permission of Health Level Seven, Inc. No part of the material may be copied or reproduced in any form outside of the Interoperability Specification documents, including an electronic retrieval system, or made available on the Internet without the prior written permission of Health Level Seven, Inc. Copies of standards included in this Interoperability Specification may be purchased from the Health Level Seven, Inc. Material drawn from these standards is credited where used.

## Revision History

---

Rev	Date	By Whom	Changes
New	July 2010	Dave Carlson	
First draft for posting	December 2010	Dave Carlson	Updated model content and publication format

# Purpose And Scope

---

## Purpose and Scope

---

This mandatory section provides details on the purpose and scope of the IEP Documentation. It answers such questions as:

What is the business purpose of the IEP?

For which justice enterprises and/or organizations was the IEP Documentation developed or targeted?

Is the IEP Documentation for a particular justice enterprise (e.g., a specific statewide integrated justice system) or is the IEP Documentation to be used as a reference?

This section can include business scenarios that help define where and when the IEP is used. Business scenario artifacts can be included in section 6.3.

# List Of Artifacts

---

## List Of Artifacts

---

This mandatory section lists the various artifacts included or referenced in the IEP Documentation. It includes both deliverable artifacts and those used during development (which could be reused for extending or modifying the IEP Documentation).

# XML Schemas

---

## XMLSchemas

---

This mandatory section provides or references the XML Schemas used to define the information exchange. Generally, but not always, the IEP Documentation will provide all four XML Schemas described in the subsections that follow.

# Samples

---

## Samples

---

This section provides samples that may be useful to an implementer to facilitate understanding of the IEP. Samples are optional, but are strongly recommended as they reduce the likelihood of misinterpretation and aid testing.

# Development

---

## Development

---

This section describes the people, process, and artifacts used in the development of the IEP Documentation. It is optional but strongly recommended, as it may aid understanding of the IEP Documentation and can greatly facilitate reuse. For these reasons it is mandatory for IEP Documentation intended to be used as a reference.

# Testing and Conformance

---

## Testing and Conformance

---

This section provides information on any testing or conformance activities. It is highly recommended when such testing or conformance activities were actually performed, especially for IEP Documentations intended to be used as a reference. The information in this section will provide additional assurance to potential users that the IEP Documentation is likely to be free from defects, meets the business requirements, and results in GJXDM- conformant Information Exchange Packages.

# Feedback

---

## Feedback

---

This section includes any lessons learned, suggestions, or recommendations that resulted from the development of the IEP Documentation. It should also include any recommended additions or changes to the GJXDM. It is strongly recommended as the experiences and feedback from development of this IEP Documentation could significantly benefit future IEP Documentation development.
